Progress & Attainment:

- Parent Booklet outlines End of Year Expectations for Year 5 or Year 6. Available also on our class page on the website.
- These are the minimum requirements in order for children to reach expected standard at the end of the year.
- Information about "Working at Greater Depth".
- We continually monitor children's progress towards detailed end-of-year expectations. We use this information to plan opportunities for learning and identify the next steps for your child.
- We will inform you of your child's progress toward these expectations on their Interim (Nov & Feb) and End of Year **Reports.** Parent-Teacher meetings will be available in the weeks following the interim reports, if you wish.

End of Year Expectations for Year 5

This booklet provides information for parents and carers on the end of year expectations for children in our school. The staff has identified these expectations as being the minimum requirements your child must meet in order to ensure continued progress throughout the following year

All the objectives will be worked on throughout the year and will be the focus of direct teaching. Any extra support you can provide in helping your children to achieve these is greatly valued.

If you have any queries regarding the content of this booklet or want support in knowing how best to help your child, please talk to your child's teacher

level of understanding. Achievement is now focussed on the depth of understanding of the areas taught and the ability to apply this understanding in a variety of context

Therefore, once pupils' knowledge is secure within their year group objectives, they are no longer couraged to move up to the learning being taught in the year above, but to deepen their under of the learning in their own year group

- apply their learning to different contexts, including other areas of the curriculum work independently after some initial input.
- apply their skills and knowledge consistently, confidently and fluently
 - organise their ideas to make connections with other areas of learning. use their ideas to help them work with new areas of learning.
- clearly explain what they have been doing and why they know they are correct to others

- working on content from the next year group
- practising the same concept with bigger numbers.
- reading a more challenging text. an end of the week challenge.

How is greater depth taught at Friezland,

When ready, pupils are provided with the opportunity to work at greater depth through carefully planner lessons and activities. Teachers will provide pupils with the time and opportunity to explore the learning objectives taught and will allow pupils the independence to apply their learning at a deeper level. Pupils may access greater depth challenges at any point in the week and across a range of subjects, as the acher assesses their knowledge and progress. Greater depth cannot be awarded overall until the teacher has seen sufficient evidence across the subject and not just in a specific area e.g. punctuation

Home learning:
