

A Parent's Guide: Working at 'Greater Depth'

What is greater depth?

The phrase 'Working at Greater Depth' appears frequently within the National Curriculum framework. Working at greater depth refers to when a child has mastered the learning objective expected for their age and is therefore able to delve deeper into the concept in more detail, resulting in pupils acquiring the level of skills they need to succeed on each part of their learning journey.

In addition to the term ***end of year expectations***, the term ***greater depth*** is now used to measure a pupil's level of understanding. Achievement is now focussed on the **depth of understanding** of the areas taught and the ability to apply this understanding in a variety of contexts.

Once a pupil's knowledge is secure within their year group objectives, they are encouraged to deepen their understanding of the learning in their own year group.

This means that pupils working at greater depth are expected to be able to:

- apply their learning to different contexts, including other areas of the curriculum.
- work independently after some initial input.
- apply their skills and knowledge consistently, confidently and fluently.
- organise their ideas to make connections with other areas of learning.
- use their ideas to help them work with new areas of learning.
- clearly explain what they have been doing and why they know they are correct to others.

Greater depth is not:

- working on content from the next year group.
- practising the same concept with bigger numbers.
- reading a more challenging text.
- an end of the week challenge.

How is greater depth taught at Friesland?

When ready, pupils are provided with the opportunity to work at greater depth through carefully planned lessons and activities. Teachers will provide pupils with the time and opportunity to explore the learning objectives taught and will allow pupils the independence to apply their learning at a deeper level.

Pupils may access greater depth challenges at any point in the week and across a range of subjects, as the teacher assesses their knowledge and progress. Greater depth cannot be awarded overall until the teacher has seen sufficient evidence across the subject and not just in a specific area e.g. spelling, calculation, scientific investigations etc.
